DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species B, claims 3-20 and 81 in the reply filed on April 12, 2010 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim 2 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Information Disclosure Statement

2. The last item listed on the IDS filed 2/1/2006 has been lined through because there is no publication date.

Claim Rejections - 35 USC § 112, 2nd Paragraph

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-21, 41, 61, and 81 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Instant claim 1, 21, 41, and 61 recite "at least one of a genotype and a haplotype or a strain variant" in lines 9, 9, 10, 11, respectively. It is unclear if this phrase is intended to recite "genotype" and "haplotype" as alternatives or as a combination a that

requires both. Please clarify via clearer claim language. Claims 2-21 and 81 are also rejected for depending from claim 1.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 21, 41, 61 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Instant claim 21 is drawn to a computer program. Instant claim 61 is drawn to a processing arrangement which may be interpreted as a computer program. A computer program is non-statutory *per se* when claimed by itself. Thus the instant claims are non-statutory.

Instant claim 41 is drawn to a storage medium. A carrier wave may transiently store data. Thus, the instant claim encompasses carrier waves. However, carrier waves are non-statutory *per se*. Thus, the instant claim is non-statutory.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1631

7. Claims 1, 3, 21, 41, and 61 are rejected under 35 U.S.C. 102(b) as being anticipated by Cutler et al. (Genome Research (2001) Volume 11, pages 1913-1925).

Cutler et al. teach a method that include providing one or more microarrays with an optimal set of oligonucleotides capable of detecting a genotype (page 1914, under “Results”; paragraph bridging pages 1923-1924); hybridizing a DNA sample to the microarray (page 1924, under “Hybridization of Amplified Target DNA to VDAs); determining a genotype based on the hybridization pattern (page 1915, under “ABACUS: An Automated Statistical System for Calling VDA Genotypes”).

Furthermore, their ABACUS system is implemented on a computer which would require a software arrangement, storage medium, and processing arrangement.
